

Carlos Alves

Remain positive and the rest will follow.

Carlos is a Mechanical Engineer, specialized in business development, industrial and engineering solutions, maintenance and R&D. His work experience, both in national and international markets, ranges from industrial manufacturing, assembly and maintenance, from the Oil&Gas to the automotive industry. His greatest assets are excellency, commitment, passion and the ability to work well in high performance contexts.

Carlos is a good team leader / member that balances the group expectations and keeps the workflow towards the objectives. Motivated by challenges, the harder the obstacles, the better he performs.

Technological Innovation as well as rock climbing (Sports), are his passions. If he could be anywhere in the world, he would still choose where his roots are, Porto, a city which has it all - culture, history and, of course, beautiful natural spots. A family man, Carlos always finds tradition and balance with his loved ones. If he could be remembered by some achievement, it would be by having inspired people around him in both professional and personal contexts. Because as Picasso once said, inspiration comes, but it has to find us working.

Career Goals

Carlos wants to leverage on his creativity, scientific rigour and business expertise to help progressive and forward thinking organisations to create innovative solutions. His goals are to work in an innovative and leading organisation.

“Twenty years from now you will be more disappointed by the things that you didn’t do than by the ones you did do, so throw off the bowlines, sail away from safe harbor and catch the trade winds in your sails. Explore. Dream. Discover.”

Mark Twain
