

David Ribeiro

Only those with a vision for the future can question the present.

From Porto, David is an investment manager and senior analyst at Banco BPI. He began working at Banco BPI in Lisbon as a financial controller and his career never stopped evolving. His love for Porto, his family and his friends brought him back. His greatest achievements were to implement an investment strategy in his team and to accomplish the hardest financial certification taught by CFA Institute for 3 long years.

David is a very persistent professional but it is by his critical thinking skill and eager for knowledge that he is recognized. Questioning and correcting errors to get the job well done is one of his most valuable assets. David is a natural problem solver and result oriented, he is constantly motivated by discovering new solutions and implement them.

A man of finance who likes the idea of winning money.

However, if he could wish for something it would be to become a leader who inspires others.

David loves the mix of adrenaline and relaxation. No wonder his favourite hobby is to practice MTB (Mountain Biking) every Sunday with his friends.
