

Dinis Novais

His path is within himself.

Born in France, he came to Portugal at the age of 7. Today his adaptive ability is one of his greatest assets. His career sums up to 14 years of dedication to one sole company. With a Civil Engineer degree, he evolved into managing considerable enterprises in public-private partnerships in the health and transports sector. Not attached to the material aspects of life, Dinis enjoys living with priorities. Personal life matters. Family matters even more. Father of three children, he dedicates all of his free time to them. Dinis has a great sense of empathy which he uses to improve the power of the team union. He likes to take risks if he feels that that is what it should be done, in the end there is nothing more appealing than a simple life. Life is too fragile to fight for accessory things. That is why he does not seek or need recognition, he is just committed to do his best and that is usually more than enough.
