

Fernando Santos

You can never stop learning.

Fernando has a Master of Science degree in Pharmaceutical Sciences and a Ph.D. in Neurosciences. His career began at a leading international research organisation, where he did research in close collaboration with partners, from both Europe and North America. This gave Fernando a strong experience managing complex projects and problems, which allied to his result-oriented profile, led him to search for a more practical application of scientific knowledge. He is the co-founder of a tech startup supported by the Champalimaud Foundation where his scientific ideas are built into practical outcomes. His biggest accomplishment was, in fact, to change his career from an academic path to a more challenging application of Science. A very dedicated and hard worker with a constant need of challenges to fuel his drive. A man of concrete results who would like to be recognized as someone who escaped mainstream and was disruptive in his career. A good learner who believes that if you are the brightest mind in the room, you are in the wrong room. His natural state of mind is to be always moving and learning. No wonder he feels at home wherever the wind and the ocean are.

Career Goals

Fernando wants to make a shift in his academic path and leverage on his creativity, scientific rigor and business expertise to help progressive and forward thinking organisations in the creation of innovative solutions. His goals are to develop his own business projects or to work in innovative and leading organisations.

“Attitude is a little thing that makes a big difference.”

Winston Churchill
