

# José Luís Pereira

Together everyone achieves more.

José Luis is a Mechanical Engineer with a solid career in the automotive industry. He first started as a Product Engineer, evolving to leadership functions. A natural teacher and leader, José Luis was invited to create and manage his own team projects. That, along with his 3 children, are his biggest life achievements so far. He built a 15- year long career in the leading multinational corporation TRW, where he was recognized for working well under pressure. José Luis likes to motivate his team and keep his fears to himself. Assertive and balanced, José Luis is interested in his personal continuous learning process, as well as for any future team he might lead. José Luis is motivated by challenges, maybe that is why he considers being a parent his talent. Well if you can manage a family with 3 small children, you can manage any professional team at ease.
