

# Naveen Kakarla

Curiosity did not kill this cat.

Naveen is an Electronics Engineer from Bangalore, India. He wanted to be an Engineer since childhood. In fact, one of the hardest moments in life was when he challenged his parents to study Engineering instead of Medicine. Happy to study the subject of his dreams, Naveen had great academic success. Detail oriented and analytical, in his free time Naveen loves to do some tinkering with electronic just for fun. Not understanding something fuels triggers his motivation. Microelectronics has been his work experience so far, but Naveen has interest in Energy Efficiency, also for Naveen climbing mountains in the Himalayas is a hobby but understanding the meaning of life is a wish. Maybe that is why he would like to be remembered for having discovered something new that changed a scientific paradigm.
