

Nuno Luz

From the pains of growing will emerge the best leaders.

This Industrial Chemicals Engineer prides himself of being a good listener. A skill that has helped him build a team from scratch when a colleague asked him to grow a production unit. Nuno took the challenge and was highly involved in the process that led the organisation from a small-medium company to a large, well established one. At times, it was difficult, Nuno won't deny it, but it was also incredibly rewarding to be a part of this process.

One thing that surely helped him get by was his love of music. Nuno enjoys going to concerts and playing, even owning several types of equipment. Once he is done with his MBA, he would like to learn how to play the sax.

Both in people as in business, Nuno believes there is nothing more important than honesty and he strives to be recognized as such. Together with a humble attitude, hard work and dedication, Nuno is making himself into a leader.
