

# Ssaaurabh Kesari

**Confidence and commitment is what you can expect from this engineer who overcame his math woes.**

Kesari would like his work to have a world impact one day. And who knows what a creative engineer could do? Interested in creativity, this Bollywood enthusiast once considered an acting career. Instead, his curiosity led him to Engineering Research. He kept his acting skills for public presentations where he is recognized as a talented speaker.

Proactive and risk-taker, Kesari was the first student in his college batch to apply for a paper and get it presented in an international conference. Kesari considers himself a positive person, optimistic even in challenging situations. His working motto is "destroy and rebuild - this is how you learn in a different and exciting way". Always loved to travel, one of his greatest accomplishments was taking his elder grandparents to travel outside India for the first time ever. Well, good things come to those who work!
