

# Vitor Ferreira

## A coach beyond the pitch.

Vitor is an experienced operational leader, with a track record of achieving efficient and innovative solutions to complex challenges, while maintaining high quality and reaching impactful results. Recognized by his energy and positivity, Vitor is at all times part of the solution, acknowledging the importance of the path, but with the final objective and the company goals always in sight.

Able to leverage both a creative and an analytical background, he drives positive results when faced with scalability issues or strategic initiatives.

During his 10 years' experience, he was responsible for operations and production in some of the most innovative and leading Portuguese multinationals, where he consistently improved operational performance.

His passion for learning and continuous improvement allowed him to gain multicultural business experience managing complex operations and projects, contributing to the permanent growth and development of organisations.

A dynamic individual who brings a rare combination of focus, leadership, and the ability to tackle problems, while never forgetting the importance of results. His passion for innovation and learning makes him very focused on technology, but for him that is merely a mean to an end. Vitor's true interest lies in using his skills to have a strong impact in the world, creating real value for the society.
