

# Diogo Tavares

## On the pathway to success

Diogo is methodical and outlines every step that he needs to take in order to be successful. This way, Diogo knows he'll never lose his way. He's an Electrotechnical Engineer, partly influenced by his father, and he has forged a career at EDP over the last decade.

Idyllically, his final professional destination would comprise a Management position, within the fields of Engineering or Energy. Today, he feels a sense of fulfilment, as his professional duties fit into the occupational field he enjoys most. Having completed his MBA, Diogo became head of the department of Investments and LV Scheduled Maintenance, in the Area of the Maia Grid and Customers, at "EDP Distribuição."

Doing good for himself and for others motivates him, as he shows an enormous willingness to change people's lives and to make things positive in the world that drives him. He enjoys cinema, travelling and is an unconditional supporter of our country. He derives happiness in seeing others happy. Diogo acts with a purpose, as he aspires to one day become a recognised and inspiring leader.
